Office Action Summary	Application No. 10/807,332	Applicant(s) YAMAMOTO ET AL.	
	Examiner Archene Turner	Art Unit 1775	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 1775

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Support cannot be found for the phrase "small specific abrasion loss" in the original disclosure.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1,3-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Seiko (JP 02-189748) or Ulvac (JP 06-158272) or Riken (JP 05-195196).

The rejection is maintained for reasons of record in the previous office action.

Applicant's arguments filed 8/30/06 have been fully considered but they are not persuasive.

The applied references clearly in the abstract disclose the amount of silicon within the present invention and thus the rejections stand. The applicant argues that the combined physical properties now added to the independent claim overcome the art of record, but without specific values to these properties the examiner disagrees.

5. Claims 1,3-4 are rejected under 35 U.S.C. 102(b) as being anticipated by BASF (DE 3803014).

6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated Hitachi Tool (JP 2001-121314).

7. The rejections of BASF and Hitachi Tools are maintained for reasons of record in the previous office action. Applicant's arguments filed 8/30/06 have been fully considered but they are not persuasive. The applicant argues that since these references include a zero value for silicon they do not anticipate the instant claims. This is not found persuasive since the ranges overlap and no values have been assigned to the added properties described in the independent claim, and thus the rejections stand.

8. Claims 1,3-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Mitsubishi Material (JP 09-01104 or 08-118106).

The rejection is maintained for reasons of record in the previous office action.

Applicant's arguments filed 8/30/06 have been fully considered but they are not persuasive.

The applied references clearly in the abstract disclose the amount of silicon within the present invention and thus the rejections stand. The applicant argues that the combined physical properties now added to the independent claim overcome the art of record, but without specific values to these properties the examiner disagrees.

9. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
